Hectorville

LAUGH SING DREAM
THE SMALLER A CHILD,
THE MORE EASILY IT LEARNS,
THE LESS IT FORGETS”

Zoltan Kodaly

While your children are playing, singing and dancing they will be learning these concepts:

- High/Low
- Soft/Loud
- Fast/Slow
- Beat Rhythmic pattern
- Creating/Improvising Movement
- Language
- Text substitution
- Vocal exploration
- Sequencing
- Memory
- Listening
- Taking turns/Sharing
- In-tune singing
- Inner hearing
- Concentration
- Consideration of others

Children develop musical memory from 22 weeks in vitro.

Birth to 10 years old is a crucial time in neural plasticity.

Laugh Sing Dream offers singing-based classes which encourage children to sing independently & tunefully.

Our teachers provide a wonderful live singing model.-Classes involve a carefully designed program of singing, movement, games, dance, hearing a book being sung, puppetry and instrument exploration based on the Kodaly approach to Early Childhood Music Education.

Children will learn a repertoire of singing material including: nursery rhymes, chants & children’s songs and experience voice exploration.

Caregivers should expect to work with our teachers and participate in activities with their children.

Singing material can be provided for the children throughout the week.

Where requested, newsletters will be provided with words to songs.
